

Powerful AV Encoding in a convenient, Wallplate form-factor

Overview

The PacketAV® Duet Wallplate Encoder has been nothing short of a paradigm shift for networked AV.

True convergence; a single platform to support Dante[™] /AES67 and Video over IP in a convenient wallplate form-factor. Building on their success and wide adoption, the next generation of PacketAV® Duet Wallplate Encoders continue to provide powerful 4K UHD Video and Dante™ /AES67 Audio over a single Gigabit Ethernet port, now with built-in bi-directional Bluetooth® wireless audio connectivity and other enhanced features.

It can be easily mounted in a wall, tabletop, lectern, or floor box using a standard 2-gang US or UK back box, and connected to power (standard POE) and Ethernet using only a single category cable.

Visionary's PackeTV® and PacketAV® products can be deployed on any industry standard IP network. They can be used on existing enterprise IP networks or a physically separate parallel network [private network] to offload traffic, using the same network protocols, methods, and devices but without intermingling of video traffic with data or voice; with equal ease of installation.

Features

One Gigabit LAN Port for 4K UHD Video, Dante™/AES67, and Control

 A single Ethernet port for Video over IP and Dante[™]/ AES67 audio embedding and de-embedding, with VLAN tagging capability to separate Audio & Video network traffic as needed

Bluetooth® Audio Connectivity

- Bluetooth® 5.0 for extended range, faster data throughput, and more reliable connections
- Bluetooth® Audio bridge for Dante™
- Supports both A2DP profile for media streaming and Hands Free Profile (HFP) for bi-directional smartphone bridging
- · Connect easily and share audio from your Mac, Laptop, Tablet, Mobile, and Other Bluetooth® enabled devices

Intuitive Single Button Bluetooth® Pairing with LED Status Indication

- Simple one button pairing/connect process, multiple pairing modes - Manual (default), Auto and Private
- Pairing button can be disabled for restricted use applications with third-party control systems
- · LED "off" mode

Balanced Audio Line Output on Rear Panel

• A rear-panel euro terminal block provides a stereo balanced audio output from Dante™ or de-embedded from HDMI.

This output can feed a variety of local devices to provide a specific line level output to users, or it may be used to directly feed an audio power amplifier in the associated audio zone.

Features cont.

Mass Configuration

- Auto Discover all endpoints on the network, export to .CSV file (all configurable parameters included), make changes offline, upload .CSV file through embedded web page of encoder/decoder and push configuration to the network
- No external software required mass configuration capabilities built into the endpoint embedded webpage UI

LLDP Support

- Link Layer Discovery Protocol (LLDP) is a protocol used by network devices for advertising their identity, capabilities, and neighbors on a local area network based on IEEE 802 technology
- Allows for dynamic control of endpoints based on automatic discovery of physical location

QoS Support

• Quality of Service (QoS) is an advanced feature that prioritizes network traffic resulting in performance improvement for critical network traffic

Control

- Vision Lite Control Software
- 3rd Party Control Drivers [Crestron, QSC, Symetrix, RTI, etc.]
- *API providing access to the full range of features on the encoders and decoders offered to qualified System Integrators

Seamless Fast Switching

Tearing free, no black screen, no frame lock

Independent Routing

• Independently route all signals with the ability to separately matrix video & Bluetooth audio (including Dante™/AES67)

HDMI 2.0 and HDCP 2.2 Compliant

Dynamically Optimized (Adaptive) bit-rate compression CODEC w/ built-in Al

- Visionary's highly efficient video compression codec is a modified full frame encoding that dynamically optimizes for fine lines (computer generated graphics) or motion video by using sophisticated AI to analyze the input source content. Actively matching the level of compression to a scene by leveraging periods of low motion video content reduces the stream's size and enhances performance - enabling, without compromising image quality, Visually Lossless transmission of computer generated graphics or full-motion video sources.
- Adjustable Video Bitrate: (50 200 Mbps or Auto [800Mbps max])

Enterprise Level Security –AES Encryption, 802.1x, HTTPS, SSH

Enterprise applications demand a secure Network AV solution

- AES Stream Encryption The Advanced Encryption Standard, or AES, is a worldwide standard and was adopted as the standard encryption algorithm by the U.S. government for encrypting classified information
- HTTPS Secure API Using secure SSL/TLS communications HTTPS provides integrity that a client is communicating with the real API and receiving back authentic data. It also ensures privacy for applications and users using
- 802.1x Authentication for Network access control -802.1X provides a secure authentication mechanism for any device trying to access a network
- SSH Network Protocol SSH is a network protocol used to remotely access and manage a device through command line communications. The key difference between Telnet (used by other AV over IP manufacturers) and SSH is that SSH uses encryption, which means that all data transmitted over a network is secure

Benefits

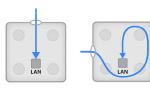

- A single Gigabit LAN Port for PoE Power, 4K UHD Video, Dante™/AES67, and Control
- Effortlessly play audio from your Bluetooth® enabled devices
- Bi-directional smartphone connectivity via Bluetooth® for web conference soft-codec AV integration
- Eliminates need for separate AV Bluetooth® bridging hardware
- Secure Network Isolation VLAN Tagging separates AV traffic on the corporate network
- Easy installation in a wall, floor, or lectern
- Mounts into standard Decora style wallplates
- Easy Control Integration

- Ultra-low Latency [~1 frame visually lossless]
- Low bitrates
- No fiber or 10 Gigabit switch required
- Low-Cost network switches are used
- Scalable / Unlimited Distribution
- Any number and combination of inputs/outputs [in increments of one]
- Standard network cabling [CAT5e/6]
- Utilize existing network resources
- Rapid deployment
- Single network for AV and IT
- Reduced operating costs

Fits conveniently into a 2-gang US or UK back box with no modification

- Low Heat / Power: Natural convection via vent openings on front, sides, and top
- 45 Degree Ethernet connector allows easy access from any side of electrical boxes while providing bend radius relief for category cable.

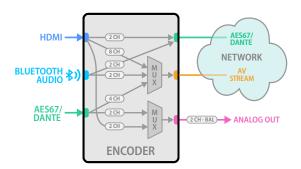

Audio Workflow

Specifications

| Encoding/Decoding | |
|--|--|
| Video Codec | JPEG2000 based visually lossless video compression algorithm |
| Audio Codec | Dante™/AES67 |
| Bit Rates | 50 to 800 Mbps |
| Latency | Ultra-low Latency (visually lossless video) 17ms @ 1080p60 & 4K60 4:2:0 33ms @ 4K30 4:4:4 |
| Streaming Protocols | IP, UDP, TCP, ICMP, IGMP |
| Copy Protection | HDCP 2.2, AES-128 Encryption |
| Video | |
| Maximum Resolutions | High Dynamic Range (HDR) 4K60 4:2:0 HDR 8 bit 4K30 4:4:4 HDR 8 bit 1080;60 4:4:4 HDR 12 bit 1080;60 4:4:4 HDR 12 bit |
